

## **Closing Remark**

Miyuki KOYAMA

Secretary General of ArTech

I would like to thank you for your attendance to the first International Symposium on Kids' ISO 14000 Programme, today at UNU. Among many guests, I would like special appreciation to Mr. Travis Inman of Boeing Australia, who came from quite far from Tokyo. I also thank all of other attendants who made this symposium fruitful.

From the presentation and discussion of today, I believe that the Kids' ISO 14000 Programme is proved to be one of the effective tools of environmental education, particularly, in stimulating awareness of children, and family member, in teaching methodology of environmental management based on PDCA cycle, and in networking locally and globally by working together.

I wish all of the activities with you on Kids' ISO Programme expand well, and I hope to see you in near future again, here or there.

Thank you, and save your journey.
